

# The New Electricity: Artificial Intelligence and You

What AI Means for Your Life, Your Work, and Your World

The hottest of hot topics—**artificial intelligence**—is everywhere. But most people are confused and afraid of what tools like *ChatGPT* mean for their lives and their careers.

*AI and You* is tailor-made for your learners to find out what AI *really* is.

The instructor is the host of the *Artificial Intelligence and You* podcast, a NASA software engineer, and a three-time TEDx speaker who has testified in Britain's Parliament on how to explain AI and its impacts to ordinary people.

More than lecture, this is a dialogue and inquiry provoking reflection and growth.

## Past Students Have Said

"I thoroughly enjoyed taking this course with Peter Scott. He has an incredible range of knowledge about artificial intelligence. With humor and deep understanding of just what is at stake he provided us with thought provoking sessions each and every class. I learned a lot! I actually think this course should be mandatory for all students."

"Peter has a world class knowledge of this subject and it shows. Managed to present an impartial narrative on a subject that can raise emotions on both sides."

## Topics Include

- ♦ What you can do with ChatGPT and image generators
- ♦ Ethics: bias, privacy, explainability, and employment impact
- ♦ The history of AI, including fiction and games
- ♦ The truth about self-driving cars and other robots
- ♦ Applications from medicine to education to commerce
- ♦ AI's existential risk and the Singularity

**Peter Scott** is the author of "Artificial Intelligence and You" (2022), holds an advanced computer science degree from Cambridge University, and has spoken before thousands of people from all walks of life about what AI means to them.

He is a certified coach and helps businesses navigate the waters of exponential change. He lives on Vancouver Island with his wife and two daughters.
